Forward-thinking software development professional that has been successful in a small business environment designing and implementing major technology modernization projects from algorithm to finished product. An innovative programmer that has mastered the development of mobile applications. Possesses a strategic ability to understand how to maximize the usage of emerging technologies in development environments. A loyal employee that transitioned from a CFO position after leading the company to record profitability into a CTO position providing hands-on coding, development and systems management leadership. *Areas of Expertise include:*

- ✓ Software Development
- ✓ Financial Management
- ✓ Mobile Applications

- ✓ Product Development
- ✓ Team Development
- ✓ Technology Modernization

- ✓ Product Engineering
- ✓ Coding
- ✓ Troubleshooting

EXPERIENCE & NOTABLE CONTRIBUTIONS

PRECISION TELEVISION • Concord, CA • 2000 - Present

CTO (2008 – PRESENT)

Increased the company's profitability by consolidating the entire IT infrastructure and executing tactical coding projects to allow for more positive customer experiences.

KEY ACCOMPLISHMENTS:

- Saved the company $350K in administrative employee wages during the economic downturn by creating an enterprise-wide automation solution to eliminate manual processes.
- Streamlined field technician operating procedures by counseling the development team on the design, implementation and training for a new native iPad service application.
- Drastically improved productivity by eliminating multiple repeat data entry in the legacy database by personally coding more than 20 applications to strengthen the infrastructure.
- Managed two coders in the planning, execution and evaluation of a comprehensive system overhaul of the company's business management system using C#, WCF, SQL Server, ASP MVC, MVVM Framework, Entity Framework, Web API, Azure, and SQL server.
- Ensured the flawless operation of the new business management system by diligently analyzing and refining testing operations.
- Transitioned from the CFO position after leading the business to record growth.

CFO (2000 – 2008)

Cultivated a corporate culture committed to proactively capitalizing on opportunities to increase sales and reduce costs.

KEY ACCOMPLISHMENTS:

- Increased the business from a $100K to $6.5M in annual revenue while maintaining competitive profit margins.
- Quickly identified and resolved any negative cash management trends by instituting robust financial metrics tracking and reporting.
- Designed laser-focused budgets ensuring each department strictly adhered to monthly, quarterly and annual guidelines to support the company's aggressive growth plan.
